

Forced Convection Oven

250°C | Uniformity $\pm 2.5\%$

LAB1ST FCO250-Pro Precision Forced Convection Oven ensures outstanding thermal uniformity ($\pm 2.5\%$) through advanced multi-segment programming and a polished stainless steel chamber with radiused corners for effortless maintenance. Equipped with an independent over-temperature protection system featuring audible and visual alarms, along with a standard 25mm test port, it guarantees safety and precision for critical laboratory applications requiring exact temperature control.

Features

- > **Polished Mirror-Finish Stainless Steel Chamber** with smooth semi-circular corners for easy cleaning. Shelves are freely adjustable and removable for flexible workspace organization.
- > **Multi-Segment Programmable Controller** with intuitive menu-driven interface for simplified operation of complex experimental protocols.
- > **Programmable controller** supports up to 7 groups (63 segments total) with timer settings from 0 to 5999 minutes per segment, adjustable fan speed, and pre-set start/stop time and heating rate capabilities.
- > **Independent Over-Temperature Protection System** with audible and visual alarms for enhanced safety.
- > **Standard 25mm Test Port** on the left side for convenient sensor insertion and wiring.
- > **Highly Accurate and Reliable Temperature Control** with excellent uniformity ($\pm 2.5\%$ at 100°C).
- > **User-Friendly Design:**
 - Large LCD screen displays multiple parameters simultaneously.
 - Self-diagnostic function detects and displays fault messages for quick troubleshooting.
